

# WAINFLEET BOX AND PALLET ENVIRONMENTAL POLICY

Wainfleet Box and Pallet conducts its operations in a manner that ensures our processes are environmentally responsible. Management routinely meets with staff to discuss best practices and procedures. All hazardous materials are handled according to current Government regulations. Our goal is to reduce, reuse and recycle whenever possible.

We have a program in place to have all used cardboard and plastic baled and sent to a recycler for additional processing and reuse. We also have a used pallet and scrap wood program in place to prevent this material from going to landfill.

In dealing with a renewal product such as wood we are constantly promoting the benefits of wood products over other man made materials to all our customers.

We also work with many of our customers to help them reduce their environmental foot print by reducing and reusing their excess material.

It is the responsibility of all employees to adhere to the Company Policy and that they operate in a manner that is environmentally responsible. We also encourage our employees to bring forward ideas to management that may help us improve our performance.

Management
